5. PHOTOS <input type="checkbox"/> Yes <input type="checkbox"/> No		6. SOURCE Military		<input type="checkbox"/> Was Astronomical <input type="checkbox"/> Probably Astronomical <input type="checkbox"/> Possibly Astronomical	
7. LENGTH OF OBSERVATION -- --		8. NUMBER OF OBJECTS one	9. COURSE -- --		<input type="checkbox"/> Other Prob sun flaring <input type="checkbox"/> Insufficient Data for Evaluation <input type="checkbox"/> Unknown
10. BRIEF SUMMARY OF SIGHTING Slide taken w/Argus C-3 Camera. Kodachrome film. Picture taken of Diamond Head, Hawaii had a round white spot in "sky" after developed.			11. COMMENTS Negative of picture analyzed & alleged obj determined to be probably due to sun striking the lens, possibly w/water droplets on the front element. The series of less apparent spots ranging across the frame is an additional reason to suspect sun flare.		

WAIKIKI, HAWAII

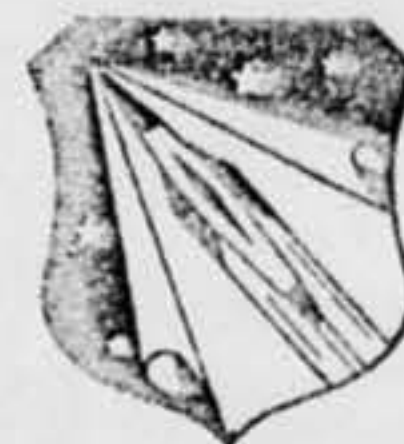

June 18, 1959

Evaluation: Sun striking the lens, possibly with water droplets on the front element, is the most reasonable explanation for the image. The series of less apparent spots ranging across the frame is an additional reason to suspect sun flare.

REPLY TO
ATTN OF: ARDC Liaison Office

SUBJECT: Report of Unidentified Flying Object (UFO)

16 November 1960

TO: ATIC (AFCIN-4E4g)
Wright-Patterson AFB, Ohio

1. A Boeing Airplane Company employee, Mr. [REDACTED], brought the inclosed color slide to my attention on 15 Nov 60. I projected the slide to the largest magnification possible at this facility and in my opinion the slide is a double exposure (possible on an Argus C-3) of a light bulb and shade and Diamond Head, Hawaii, although the circumstances as described by Mr. [REDACTED] appears to refute this. The double exposure may have been made at the time of development, or at some other time in the process of manufacture. However, in accordance with AFR 200-2, I am submitting the slide and information relative to the picture and if additional information is required, please contact Mr. [REDACTED] or myself. As some of the information requested by AFR 200-2 is unknown, the specified format could not be followed.

- a. Camera: Argus C-3.
- b. Film: Kodacolor.
- c. Date picture taken: 18 June 1959.
- d. Date picture developed (commercially): February 1960.
- e. Time picture taken: 1400.
- f. Place: Waikiki Beach, Hawaii.
- g. Name: [REDACTED] Levee, Washington.

2. According to Mr. [REDACTED], he was in the U.S. Navy in June of 1959 and was a crew member of the U.S.S. Pine Island AV-12. He was on liberty on 18 June and spent the entire day on shore taking two rolls of film. After returning to the ship, he put the undeveloped rolls of film away and did not have them developed until he was discharged from the Navy in January 1960. He noticed the "spot" when he received the slides, but did not know what to do about it until he was employed by Boeing Airplane Company and was referred to my office.

3. Mr. [REDACTED] disclaims any knowledge of a double exposure and did not reload his camera near a light source. He was on the beach at the time he was taking

pictures and this was one of many pictures he snapped that afternoon. He does not develop pictures himself and has been taking pictures about ten years. He is 22 years old and is a draftsman with the Missile Development Center (BOMARC) of Boeing Airplane Company.

1. The object referred to as a UFO could most probably be the result of one of two conditions; reflections from a glass window through which the scene was photographed or, the photograph is a double exposure. The fact that the color balance is quite good tends to favor the possibility of reflections, of which there are a number scattered across the format, rather than a double exposure.

2. To further exploit this photography it will be necessary to find out if the scene was in fact photographed through a glass window and also to obtain the original Koda color negative.

ARDC Liaison Office, c/o Boeing Airplane Co., Seattle 24, Washington

TO: ATIC (AFCIN-4E2x), Wright-Patterson AFB, Ohio

1. The photograph was taken outside on the beach and, according to Mr. [REDACTED], none of the pictures on the roll of film were taken inside. He also was outside when the roll of film was inserted and spent the entire day on the beaches taking pictures.
2. Mr. [REDACTED] is reluctant to part with the original Kodak color negative and unless it is absolutely necessary would prefer not to send it. However, if he can be guaranteed that it will be returned to him, he would be willing to forward it as requested.

1st Ind (AFCIN-4D4a)

24 March 1961

TO: AFCIN-4E2x

1. The 35mm color transparency received for examination is Kodachrome rather than Kodacolor as stated by Mr. Sigel.
2. The so-called "spot" could have been caused by the following, in order of probability:
 - a. Specular reflection or refraction
 - b. Reflection from a glass window
 - c. Double exposure
 - d. Processing flaws.
3. Sun striking the lens, possibly with water droplets on the front element, is the most reasonable explanation for the image. The series of less apparent spots ranging across the frame is an additional reason to suspect sun flare.
